System Controls

And Processes

In business and

accounting,

information technology

controls (or IT controls)

are specific activities

performed by persons

or systems designed to

ensure that business

objectives are met.

They are a subset of an

enterprise's internal

control.

Internal Controls:

Internal controls are the controls established within an organization to check errors and frauds in the system. Establishment and maintenance of controls is a responsibility of the management. General control and application control are the types of internal control.
