important parts of an engine. It is made by pouring the molten iron or aluminum alloy into a mold. The mold is made such that we should have required number of holes in the casted block, which are said to be the number of cylinders of an engine or engine cylinders. The diameter of these holes is called the bore of an engine.

Main Parts of an Internal Combustion Engine - mech4study

Let's look at some key engine parts in more detail. Spark plug. The spark plug supplies the spark that ignites the air/fuel mixture so that combustion can occur. The spark must happen at just the right moment for things to work properly. Valves. The intake and exhaust valves open at the proper time to let in air
