## **Biology And Habitat Part I Aquatic Insect Ecology**

Begins with a brief overview of the insect orders with aquatic representatives. Continues with evolutionary considerations, habitat occurrences of aquatic insect communities and the relationship of these insects to environmental variables such as temperature, substrate, flow and water level, suspended sediment, light, oxygen and other chemical factors.

## **Aquatic Insect Ecology, Part 1: Biology and Habitat | Wiley**

Habitat in Parasitology. In parasitology, a habitat is a location or an environment where the parasite is most likely to be found. Thus, it may be a body part of its host. For example, a head louse's habitat is the scalp of its host. *Ascaris lumbricoides* is a parasitic roundworm that utilizes the intestine of its host as its habitat.
