Capitalism is a system of largely private ownership that is open to new ideas, new firms and new owners—in short, to new capital. Capitalism’s rationale to proponents and critics alike has long been recognized to be its dynamism, that is, its innovations and, more subtly, its selectiveness in the innovations it tries out.

Theory of Capitalism | The Center on Capitalism and Society

No one should engage with racial capitalism because it is trendy. Racial capitalism should not and could not be a single metatheory of racism, as Bhattacharyya also argues. We should absolutely use the theories of discrimination, bias, stratification, inequality, social movements, and social justice that have contributed so much to the profession.

Based on the key idea that social protection in a modern economy, both inside and outside the state, can be understood as protection of specific investments in human capital, the book offers a systematic explanation of popular preferences for redistributive spending, the economic role of political parties and electoral systems, and labor market stratification (including gender inequality).

Capitalism, Democracy, and Welfare | Torben Iversen

In the academic capitalist knowledge regime, institutions compete for prestige and funding. Reward structures emphasize science and engineering (S&E) fields for their potential to generate money and status. Masculine norms and male majority in S&E fields may create conditions for gender differences in faculty compensation. We explored the relationship between institutional S&E emphasis and the ...
