Award-winning writer Mary Ellen Hannibal has long reported on scientists' efforts to protect vanishing species, but it was only through citizen science that she found she could take action herself. As she wades into tide pools, spots hawks, and scours mountains, she discovers the power of the heroic volunteers who are helping scientists measure—and even slow—today's unprecedented mass extinction.

centuries of amateur observation by writers and naturalists. Prompted by her novelist father's sudden death, she also examines her own past and discovers a family legacy of looking closely at the world.

Citizen Scientist: Searching for Heroes and Hope in an Age ...

Mary Ellen Hannibal needed to find out. Hannibal, an award-winning writer and emerging emissary from scientists to the public, sets out to become a citizen scientist herself. In search of vanishing species, she wades into tide pools, follows hawks, and scours mountains. The data she collects will help environmental research—but her most precious discovery might be her fellow citizen scientists: a heroic cast of volunteers devoting long hours to helping scientists measure—and even slow ...
