Keep Data Protected With Hitachi TrueCopy Remote Replication Software. Read this datasheet to explore how Hitachi TrueCopy remote replication software ensures business continuity and disaster recovery with synchronous replication and data protection, and improves productivity for both business and IT processes.

Keep Data Protected With Hitachi TrueCopy Remote ...

Hitachi TrueCopy and Hitachi Universal Replicator provide a smarter approach to avoid business disruptions with comprehensive remote replication capabilities across multisite topologies.

Hitachi TrueCopy and Hitachi Universal Replicator ...

When setting up a TrueCopy pair, there will be an initial copy phase in which all data from the primary, production volume will be copied to the secondary, mirror volume. Afterwards, when new data is written from a host to the local system, the data will be copied to the remote system's mirror volume and additional updates from the host will be held until both systems' volumes have received the prior update data.
