If There's Squash Bugs in Heaven, I Ain't Stayin' BY STACIA SPRAGG-BRAUDE. The farm these harvest days is gold and earthy, a ten-year-old at the end of summer, all tanned and callused and rule-free. Fruit isn't so much picked from the trees as it simply surrenders.

If There's Squash Bugs in Heaven, I Ain't Stayin' - El Palacio

Squash bugs produce only one generation each year in cold-winter climates or two in warm climates. So if you can keep them at bay for spring, you stand a good chance of avoiding any issues for the rest of the growing season. Start by installing floating row covers over seedlings. Leave them up until the vines start to blossom and need

How to Get Rid of Squash Bugs and Prevent Future Infestations

There are a few different sprays you can make to rid your garden of squash bugs. The first is a garlic and onion mix. Combine onion and garlic in a jug with a gallon of water and let it sit for a while until the smell is potent. Pour this mixture on the ground around the bottom of your plant, where the squash bugs most commonly meet.

How to Get Rid of Squash Bugs Naturally & Permanently

The key to the control of squash bugs is to interrupt their life cycle since they have just one generation each year. The females live over the winter in plant debris and then come out in the spring to lay their reddish brown eggs on the leaves of cucumber, squash, melons and pumpkins. Vegetable gardens will soon be full of squash and zucchini.
