**Eclipse Guide - Get Ready for Next Eclipses!**  
During a lunar eclipse, Earth comes between the Sun and the Moon, blocking the sunlight falling on the Moon. There are two kinds of lunar eclipses: A total lunar eclipse occurs when the Moon and Sun are on opposite sides of Earth. A partial lunar eclipse happens when only part of Earth's shadow covers the Moon.

You may be wondering what the difference between a Solar and Lunar eclipse is. A Lunar eclipse occurs when the Earth passes directly between the Sun and the Moon - the resulting shadow is the Lunar Eclipse. Lunar eclipses take place during the New Moon, while Solar eclipses occur on the Full Moon.

**The Ultimate Guide to Lunar & Solar Eclipses | Astrology ...**  
A lunar eclipse occurs when the Moon moves into the Earth's shadow. This can occur only when the Sun, Earth, and Moon are exactly or very closely aligned (in syzygy) with Earth between the other two, and only on the night of a full moon. The type and length of a lunar eclipse depend on the Moon's proximity to either node of its orbit.

**Lunar eclipse - Wikipedia**  
While the shadow of the moon falls on the earth in a solar eclipse, the reverse is true in a lunar eclipse. The shadow of the earth moves over the moon. Since the earth is larger than the moon, lunar eclipses are quite different from solar eclipses. When the moon crosses earth's orbit, earth casts its shadow and a lunar eclipse takes place.

List of Solar and Lunar Eclipses Worldwide 2020. Check where the eclipses are visible and if you can see them.

**Solar and Lunar Eclipses Worldwide - 2020**  
A lunar eclipse is the opposite; the moon passes through the Earth's shadow as it orbits the planet on the opposite side of the sun. Because the moon's orbit is offset from Earth (5°), we do not get a lunar eclipse during every full moon. It is this same tilted orbit that keeps solar eclipses rare, as well.

**22 Tips for Photographing a Lunar Eclipse | B&H Explora**  
Starting Exposure: The Lunar Eclipse Exposure Guide is a good starting point for photographing the moon during a lunar eclipse using a telephoto or super telephoto lens or telescope. Bracket your exposures by under- and over-exposing by one or two f/stops to ensure that you get a perfect exposure.

**How to Photograph a Lunar Eclipse | Nikon**  
"This lunar eclipse asks us to question our beliefs and stay open to new information and new possibilities." "Our world is on the brink of global change, and if we want it to result in a more peaceful, equal and healthy world, we have to do our part to make it happen. Because the old order isn't going down without a struggle.
