This paper discusses the possible improvement in surface roughness and material removal rate by applying a magnetic field around the workpiece in AFM. A set-up has been developed for a composite process termed magneto abrasive flow machining (MAFM), and the effect of key parameters on the performance of the process has been

been recently claimed to be another improvement over AFM, which performs three-dimensional machining of complex components.

ABSTRACT

Magnetic abrasive finishing. Magnetic Abrasive Finishing refers to using 1 μm - 2 mm iron particles mixed with an

Download Ebook Magneto Abrasive Flow Machining Journal

abrasive to apply the machining force through manipulation of the particles with a magnetic field. The magnetic particle and abrasive mixture is commonly referred to the "magnetic brush" because it appears and behaves similar to a wire brush.
