FICM Went Bad - Symptoms and Fixes | Ford Powerstroke ...

Ficm Don't know what your symptoms are for your FICM problems, but mine were that As soon as it hit low 30's here I had a heck of a "cold start problem". I had to keep on the starter to just get enough cylinders to fire to keep it running. BAD. All was fine when warmed up. Anyway, glow plug relays checked out.

Ficm Going Bad... | The Diesel Stop

Faulty ficm's can cause a multitude of weird symptoms like you described. The standard 48 volts that a ficm provides to the injectors can flucuate erratically between 24 and 48 volts when a ficm is failing, and can do this for along time before it finally quites working.

symptoms of my FICM | The Diesel Garage

I think that if it was a bad injector it must be in the metering part of the control section. Is there a way to check the F.I.C.M and has anybody heard of one causing this problem. I have been working on diesels for 26 years both big and small but this is my first duramax.

What are the symptoms of a failing F.I.C.M? | Chevy and ...

The FICM has been a source of problems for owners of the 6.0. The most common complaints involve hard starting and poor cold-weather starting. Other issues that can be traced back to a cranky FICM are loss of power, excessive smoking (of the engine, not the driver), rough idle, and, of course, not starting at all.

Handy FICM Fix for the Ford 6.0L - Diesel World

Also when putting back in lay the ficm back on top of the harnesses and with a hand on both sides, use your finger tips to plug them back in (listen for the click). Don't try to turn it on its side to plug it in it is more difficult this way (imho). If you do put it back together and it runs bad or misses then you bent a pin.
