Turn Lead Into Gold, With Modern Alchemy : 8 Steps (with ...

One of the supreme quests of alchemists was to transmute (transform) lead into gold. Lead(atomic number 82) and gold (atomic number 79) are defined as elements by the number of protons they possess. Changing the element requires changing the atomic (proton) number. The number of protons in an element cannot be altered by any chemical means.

Gold, he said, is externally hot and moist whereas lead is externally cold and dry. That meant that lead was internally hot and moist like gold. Therefore, if we could rearrange those qualities we could turn lead into gold. Of course, this reaction would require a catalyst and this catalyst was the philosopher's stone. Take a minute for that to sink in.

How to turn lead into gold | periodically amended

While alchemists might not have succeeded in turning lead into gold, it is now scientifically possible - if you can collide neutrons with lead atoms at speed. Unfortunately, this method works out far more expensive than the minuscule amount of gold it creates is worth. So why bother?

Turning Lead Into Gold With The High Confessions | Discogs

Nuclear experiments have successfully transmuted lead into gold, but the expense far exceeds any gain. It would be easier to convert lead into gold via neutron capture and beta decay by leaving lead in a nuclear reactor for a long period of time. Glenn Seaborg produced several thousand atoms of gold from bismuth, but at a net loss.
